PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student (2026) with 400+ hours of hands-on Java Full Stack Development training. Proficient in Core Java, Spring Boot, React.js, RESTful API development, MySQL, JDBC, and Git. Experienced building end-to-end web applications using IntelliJ IDEA, Postman, and Maven. Strong foundation in Data Structures & Algorithms, OOP, SOLID principles, and Agile/Scrum. Seeking a Software Developer or Full Stack Developer role to deliver clean, scalable, production-ready solutions.

TECHNICAL SKILLS

Languages: Java (Core & Advanced)

Backend: Spring Boot, Spring MVC, JDBC, RESTful API Design, JSON, Maven

Frontend: HTML5, CSS3, Axios, Responsive Web Design, CSS Flexbox/Grid

Database: SQL*Plus, JDBC, DDL/DML, Query Optimization, Relational Schema Design

Dev Tools: Git, GitHub, IntelliJ IDEA, VS Code, Eclipse, Postman, Maven, Render, GitHub Pages

Concepts: OOP, Collections Framework, Exception Handling, DSA, Agile/Scrum, SOLID Principles, Client-Server Architecture

INTERNSHIP & TRAINING

Java Full Stack Developer Trainee | *JSpiders / QSpiders, Noida*

- Tools Used:** Java, Spring Boot, React.js, MySQL, JDBC, HTML5, CSS3, Git, Postman, Maven, IntelliJ IDEA, Eclipse, VS Code.
- Completed 400+ hours of industry-grade training covering Core Java, Advanced Java, OOP, Collections Framework, Exception Handling, DSA, and SQL — applied through real-time project modules across the full SDLC.
- Designed and developed RESTful backend services using Spring Boot (Controller → Service → Repository architecture) with MySQL via JDBC; implemented HTTP response mapping, exception handling, and relational database operations.
- Built responsive frontends using React.js with functional components, state management, and Axios API integration; applied CSS3 Flexbox/Grid for mobile-first layouts; practised Git branching strategies and Agile/Scrum sprint workflows.

PROJECTS

Expense Tracker Application | *Spring Boot | MySQL | JDBC | Axios | Maven | Postman | Git* github.com/debjitroy-1

- Purpose:** Full-stack personal finance web app for adding, categorizing, filtering, and analyzing monthly expenses with real-time dashboard reporting.
- Backend:** 10+ REST API endpoints in Spring Boot for expense CRUD, category filtering, and monthly aggregation; MySQL via JDBC with optimized SQL queries; all APIs validated in Postman.
- Frontend:** React.js functional components with state management and Axios API calls; implemented form validation, dashboard views, and responsive CSS3 layout.
- Workflow:** Packaged with Maven; Git feature-branch workflow on GitHub; backend deployed on Render.

Personal Portfolio Website | *HTML5 | CSS3 | JavaScript | GitHub Pages*

Live: debjitroy-1.github.io/Resume

- Purpose:** Fully responsive developer portfolio showcasing projects, skills, and downloadable resume — deployed live on GitHub Pages.
- Built with:** Semantic HTML5, CSS3 Flexbox/Grid, and vanilla JavaScript — no external frameworks — achieving fast load times, cross-browser compatibility, and complete mobile responsiveness.

EDUCATION

B.Tech — Computer Science Engineering | *Asansol Engineering College*

2021 – 2026

CGPA: 7.24 / 10 | Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

12th — Higher Secondary (PCM) | *Priya Darshini Public School*

2021

10th — Secondary | *Green Point Academy*

2019

ACHIEVEMENTS & HIGHLIGHTS

- Completed 400+ hours of Java Full Stack training covering Core Java, Spring Boot, React.js, RESTful APIs, SQL, Git, Maven, and Agile SDLC — equivalent to a professional bootcamp; strong grasp of SOLID principles and clean code practices.
- Independently built and deployed two live projects (Expense Tracker + Portfolio) demonstrating full end-to-end ownership; consistently practising DSA and problem-solving for technical interview preparation.
